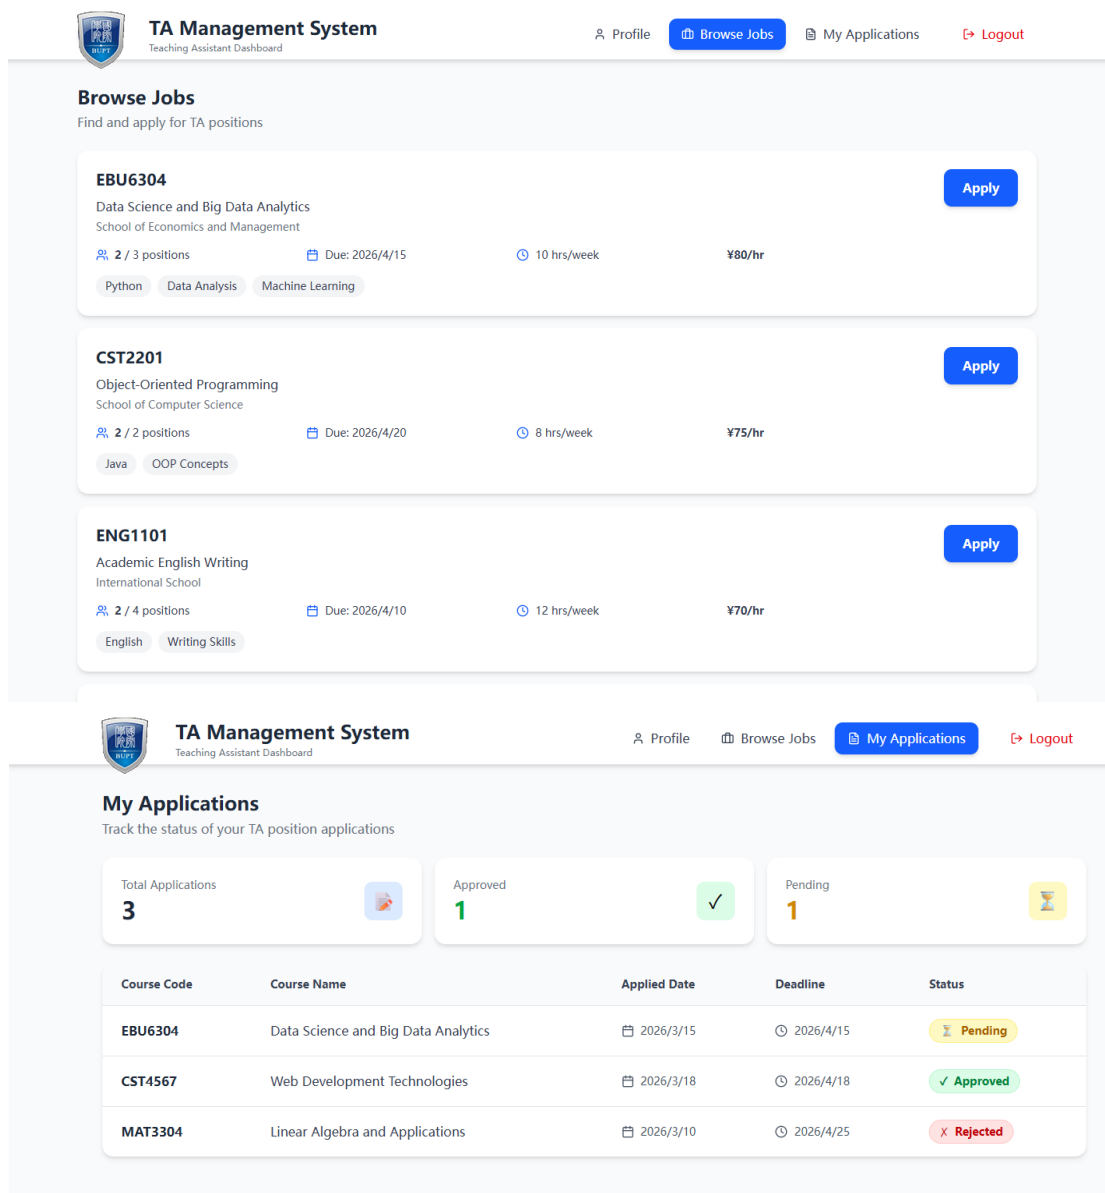

Figure 2,3,4: TA Applicant Dashboard

The TA Dashboard is designed for students to manage their profiles and applications efficiently. The '**Browse Jobs**' section displays a real-time list of available positions parsed from the job data files. Students can filter opportunities based on their skill sets. The '**My Applications**' section provides transparency by allowing students to track the live status (e.g., Pending, Accepted, or Rejected) of their submitted applications.

Liu Yang 2021211238	EBU6304 Data Science and Big Data Analytics	2026/3/17	4.0	Pending	View CV Approve Reject

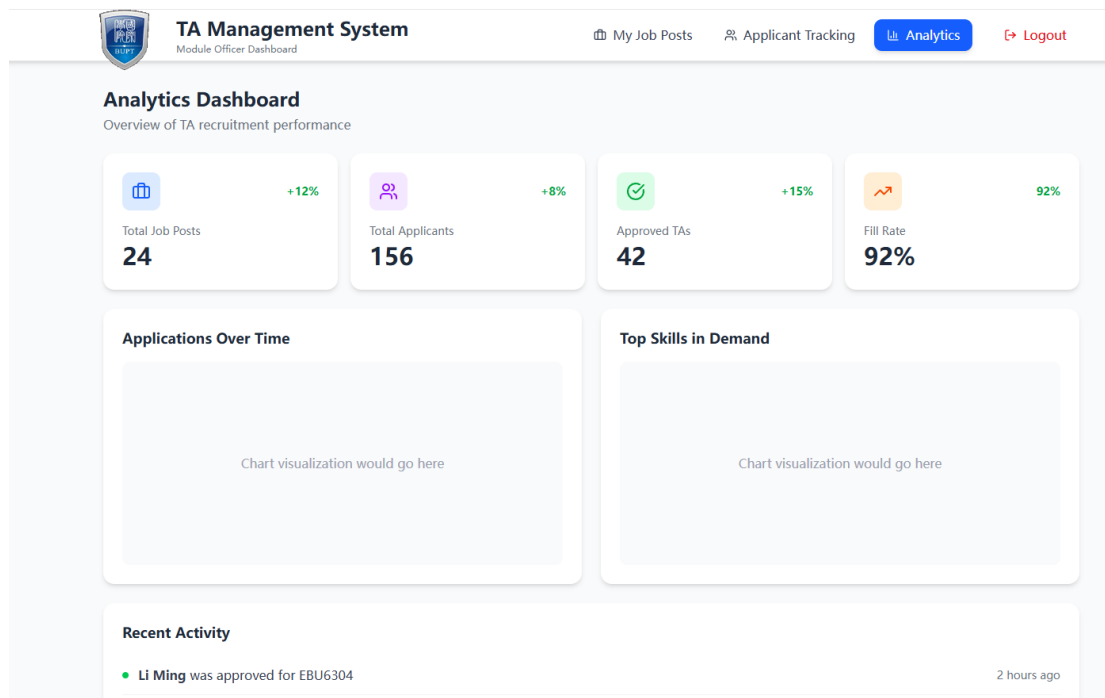

Figure5,6,7: Module Organiser (MO) Management View

The MO interface focuses on recruitment workflow management. It includes a **'Post Job'** form where lecturers can define module requirements and specific skill tags. The **'Applicant Tracking'** table allows MOs to review CVs and academic backgrounds of applicants. A key feature is the decision-making toggle, enabling MOs to 'Approve' or 'Reject' candidates, which immediately updates the global application records.
